

**Heather Faubert  
Research Associate  
University of Rhode Island**

Heather has worked in the Plant Sciences Department at URI since 1981. In 2005 she became director of the URI Plant Clinic, identifying plant problems for farmers, landscapes and plant owners in Rhode Island. She is well known for diagnosing the innumerable diseases, pests and other problems that southern New England plants battle each year and providing protocols for safe treatment. She has worked closely with the Rhode Island Nursery and Landscape Association for the past 15 years.

### ***Caterpillars and Borers Attacking Trees***

Our landscapes and forests have been under attack from numerous caterpillars and wood boring insects. This talk will focus on identification, life cycle and management of these insects.

1:00PM – 2:00PM – Orleans A+B
